**Alberta North American Waterfowl
Management Plan Partnership
Funding for Science Projects**

**Application Form
2019—2020**

The North American Waterfowl Management Plan (NAWMP) was established in 1986 for the protection of waterfowl and their habitats. This Plan focuses on the value of maintaining an adequate habitat base to ensure perpetuation of North American waterfowl populations. Many other wildlife species are associated with Plan habitats and must be considered in developing operational plans for habitat preservation.

The AB NAWMP Partnership seeks to maintain healthy prairie, parkland and boreal landscapes that support sustainable bird populations and provide ecological and economic benefits to society.

The Alberta NAWMP Partnership allocates annual funds, to a maximum of \$30,000, to be used towards science projects that relate to annual priorities that the AB NAWMP Committees have set in place. These projects deal with waterfowl or non-waterfowl issues, but must possess potential management implications for Plan activities in Alberta.

Successful projects will be chosen based on their alignment with AB NAWMP goals and their ability to deliver on current AB NAWMP priorities. All projects submitted will be ranked, and a vote by the AB NAWMP Management Committee will determine the successful candidate(s).

The 2019-2020 fiscal year priorities include:

1. Ecosystem Services
2. Conservation Planning
3. Human Dimensions

Use this document to apply for new projects starting in 2019—2020. Funds received must be utilized by March 31, 2020.

Applications must be submitted by January 31, 2019 to:
